

**Our aim is to see university education as the personal development process of individuals; to be the leading institution that delivers dormitory service to multi-dimensional service delivery and continuously improves it.**

Enis ÇEBİ Dormitories firstly embarked on the university-profession process of their dreams in a dormitory concept, apart from the way we got used to our esteemed students who were educated at our neighboring universities in the 2012-2013 academic year; has started to serve with the aim of living the family warmth in a dormitory environment with the comfort of a hotel.

Our founders have been very effective in facilitating this process that our students spend away from their families and environment, by transferring their experience of studying outside the city to our process.

It has been our primary wish for us to feel this feeling, that our students have gained their professional identity, lived in a family-friendly dormitory environment when they looked back and saw us as a positive part of those years.

We consider all our students who joined us in this process as valuable members of the E.Ç. family, and we are proud of our growing family every year.

We would like to thank all our students and their families who have made us proud that we are the first and only dormitory that provides full quota service every year since the year we were put into service.

We wish all our fellow students to have an auspicious and peaceful education and life process from the beginning to the end of their university life.
